

SUNAO SUGIYAMA

Compiled on March 22, 2023

CONTACT INFORMATION

Address Kavli Institute for the Physics and Mathematics of the Universe (WPI),
UTIAS The University of Tokyo, Kashiwa, Chiba 277-8583, Japan
Room Student room C2
Email sunao.sugiyama@ipmu.jp
Webpage <https://git-sunao.github.io>
Github <https://github.com/git-sunao>

RESEARCH INTERESTS

Theoretical and Observational cosmology
large-scale structure of the Universe, gravitational weak/micro lensing, primordial black hole

MAJOR INVOLVEMENT IN LARGE PROJECTS

Subaru HSC weak lensing working group, member (2021-present)

EDUCATION

University of Tokyo, Tokyo, Japan April 2020 – present
Ph.D. course in Physics, July, 2018
Supervisor: Prof. Masahiro Takada

University of Tokyo, Tokyo, Japan April 2018 – March 2020
M.S. in Physics, July, 2018
Dissertation: “*Validation of cosmological analysis based on perturbation theory for wide-field galaxy survey*”
Supervisor: Prof. Masahiro Takada

University of Tokyo, Tokyo, Japan April 2014 – March 2018
B.A. in Physics, March, 2018

AWARDS AND FELLOWSHIP

Research Fellowships for Young Scientists (Doctoral Course Students, DC2), Japan Society for the Promotion of Science, Apr. 2021 – present

International Graduate Program for Excellence in Earth-Space Science (IGPEES), World-leading Innovative Graduate Study Program (WINGS), Sep. 2018 – present

GRANTS

Grant-in-Aid for JSPS Research Fellows (DC2)

OBSERVATIONS

PI, Definitive search for PBH dark matter in the multiverse cosmology with HSC ([Subaru website](#))

PROFESSIONAL SOCIETY

The Astronomical Society of Japan (ASJ), 2018 – present

The Physical Society of Japan (JPS), 2022 – present

PUBLICATIONS

For up-to-date list of my papers, please see [ADS](#).

* = Author list alphabeticized

Major author

1. H. Miyatake, **Sugiyama, Sunao**, M. Takada, et al. Cosmological inference from an emulator based halo model. II. Joint analysis of galaxy-galaxy weak lensing and galaxy clustering from HSC-Y1 and SDSS. *Phys. Rev. D*, 106(8):083520, [October 2022:083520](#). doi: 10.1103/PhysRevD.106.083520
2. H. Miyatake, Y. Kobayashi, M. Takada, et al. Cosmological inference from an emulator based halo model. I. Validation tests with HSC and SDSS mock catalogs. *Phys. Rev. D*, 106(8):083519, [October 2022:083519](#). doi: 10.1103/PhysRevD.106.083519
3. **Sugiyama, Sunao**. Fast Fourier Transformation Based Evaluation of Microlensing Magnification with Extended Source. *ApJ*, 937(2):63, [October 2022:63](#). doi: 10.3847/1538-4357/ac8df1
4. **Sugiyama, Sunao**, M. Takada, H. Miyatake, et al. HSC Year 1 cosmology results with the minimal bias method: HSC \times BOSS galaxy-galaxy weak lensing and BOSS galaxy clustering. *Phys. Rev. D*, 105(12):123537, [June 2022:123537](#). doi: 10.1103/PhysRevD.105.123537
5. **Sugiyama, Sunao**, M. Takada, and A. Kusenko. Possible evidence of QCD axion stars in HSC and OGLE microlensing events. *arXiv e-prints*, arXiv:2108.03063, [August 2021:arXiv:2108.03063](#)
6. **Sugiyama, Sunao**, V. Takhistov, E. Vitagliano, et al. Testing stochastic gravitational wave signals from primordial black holes with optical telescopes. *Physics Letters B*, 814:136097, [March 2021:136097](#). doi: 10.1016/j.physletb.2021.136097
7. *A. Kusenko, M. Sasaki, **Sugiyama, Sunao**, et al. Exploring Primordial Black Holes from the Multiverse with Optical Telescopes. *Phys. Rev. Lett.*, 125(18):181304, [October 2020:181304](#). doi: 10.1103/PhysRevLett.125.181304
8. **Sugiyama, Sunao**, M. Takada, Y. Kobayashi, et al. Validating a minimal galaxy bias method for cosmological parameter inference using HSC-SDSS mock catalogs. *Phys. Rev. D*, 102(8):083520, [October 2020:083520](#). doi: 10.1103/PhysRevD.102.083520
9. **Sugiyama, Sunao**, T. Kurita, and M. Takada. On the wave optics effect on primordial black hole constraints from optical microlensing search. *MNRAS*, 493(3):3632–3641, [April 2020:3632–3641](#). doi: 10.1093/mnras/staa407
10. H. Niikura, M. Takada, N. Yasuda, et al. Microlensing constraints on primordial black holes with Subaru/HSC Andromeda observations. *Nature Astronomy*, 3:524–534, [April 2019:524–534](#). doi: 10.1038/s41550-019-0723-1

Contributing author

11. Y. Park, T. Sunayama, M. Takada, et al. Cluster cosmology with anisotropic boosts: validation of a novel forward modelling analysis and application on SDSS redMaPPer clusters. *MNRAS*, 518(4):5171–5189, [February 2023:5171–5189](#). doi: 10.1093/mnras/stac3410
12. T. Zhang, X. Li, R. Dalal, et al. A General Framework for Removing Point Spread Function Additive Systematics in Cosmological Weak Lensing Analysis. *arXiv e-prints*, arXiv:2212.03257, [December 2022:arXiv:2212.03257](#)

SELECTED TALKS

Listing 17 selected talks among 25 talks.

1. Cosmology analysis with Subaru HSC Y3 data and SDSS data: cosmological parameter inference in Λ CDM model, [2023 Spring Annual Meeting of ASJ](#), 2023, Mar., *Oral*
2. Cosmology analysis with Subaru HSC Y3 data and SDSS data: a joint analysis of cosmic shear + galaxy-galaxy lensing + galaxy clustering, [2022 Autumn Annual Meeting of ASJ](#), 2022, Sep., *Oral*
3. Revealing the nature of dark matter with gravitational lensing: weak and microlensing, [Colloquium at Osaka theoretical astrophysics group](#), 2022, Jul., *Oral* (Invited Talk)
4. HSC cosmology: Joint analysis of galaxy-galaxy lensing and clustering from Subaru HSC and SDSS data, [77th Annual Meeting of JPS](#), 2022, Mar., *Oral*
5. Exploring Primordial black hole with microlensing observation of Andromeda galaxy, [Subaru Users Meeting 2021](#), 2022, Jan., *Oral*
6. Joint analysis of galaxy-galaxy lensing and clustering at large scales from Subaru HSC and SDSS data, [34th astro-theory Symposium](#), 2021, Dec., *Oral*
7. Joint analysis of galaxy-galaxy lensing and clustering at large scales from Subaru HSC and SDSS data, [2021 Autumn Annual Meeting of ASJ](#), 2021, Sep., *Oral*
8. Exploring Dark Matter Candidates with Microlensing, [KEK theory seminar](#), 2021, Apr., *Oral*
9. Constraining PBH with HSC microlensing, IPMU phenomenology lunch journal club, 2020, Dec., *Oral*
10. Testing stochastic gravitational wave signals by PBH microlensing, [4th KEK-PH + KEK-Cosmo Joint Lectures and Workshop on "Gravitational Wave"](#), 2020, Nov., *Oral* (Invited Talk)
11. Observational constraint on PBH scenarios with HSC microlensing, [9th workshop on observational cosmology](#), 2020, Nov., *Oral*
12. Developing a method of cosmological parameter inference from galaxy survey data by Subaru/HSC, [Summer school for young researchers in astronomy/astrophysics](#), 2020, Aug., *Oral*
13. Validating a minimal galaxy bias method for cosmological parameter inference using HSC-SDSS mock catalog, Seminar at Daniel Eisenstein group@CfA, 2020, Aug., *Oral*
14. Validation of PT-based method for cosmology analysis with wide field galaxy survey data, Seminar at astro group of Hiroasaki University, 2020, Feb., *Oral*
15. Validation of PT-based method for cosmology analysis of wide field galaxy survey data, [2019 Autumn Annual Meeting of ASJ](#), 2019, Sep., *Oral*
16. On the wave effect of PBH microlensing in the observation of the M31 stars, [2019 Spring Annual Meeting of ASJ](#), 2019, Mar., *Oral*
17. Wave effect on PBH micro-lensing and constraint, [7th workshop on observational cosmology](#), 2018, Dec., *Oral*

PEER REVIEWS

Reviewer of International Journal of Modern Physics D

PRESS RELEASES

Primordial black holes and the search for dark matter from the multiverse ([IPMU website](#))

PROGRAMMING SKILLS

Computing Language	C, C++, Python, HSC pipeline (for image analysis)
Code developed	fft-extended-source
Software Maintenance	dark emulator as a part of Dark Quest Project

SEMINARS AND WORKSHOPS ORGANIZED

IPMU weekly lunch seminar (co-organizer), 2019 – 2021

HSC weaklensing mini workshop, Aug. 2022
