## RESEARCH INTERESTS

---

**Theoretical and Observational cosmology:** *large-scale structure of the Universe, gravitational weak/micro lensing, primordial black hole*

## COLLABORATIONS

---

Subaru HSC weak lensing working group, member (2021-present, **co-chair** since 2024Nov)  
Dark Enrgy Survey (DES), member (2024-present), LSST member(2024-present), Roman HLIS (2024-present)

## POSITIONS

---

|                   |                                                                                                                                                                                                                                     |                       |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Current</b>    | <b>Project researcher</b> ,<br>Kavli IPMU, Chiba, Japan                                                                                                                                                                             | Feb. 2026 – present   |
| <b>Past</b>       | <b>Postdoctoral researcher</b> ,<br>University of Pennsylvania, Philadelphia, the United States<br>Mentor: Prof. Bhuvnesh Jain                                                                                                      | Sep. 2023 – Jan. 2026 |
|                   | <b>JSPS Overseas Research Fellow</b> ,<br>University of Pennsylvania, Philadelphia, the United States                                                                                                                               | Sep. 2023 – Aug. 2025 |
|                   | <b>Project researcher</b> ,<br>Kavli IPMU, Chiba, Japan<br>Mentor: Prof. Masahiro Takada, funded partially by <b>beyond AI</b>                                                                                                      | Apr. 2023 – Aug. 2023 |
|                   | <b>JSPS Research Fellowships for Young Scientists</b> ,<br>Kavli IPMU, Chiba, Japan                                                                                                                                                 | Apr. 2021 – Mar. 2023 |
| <b>Educations</b> | <b>University of Tokyo, Tokyo, Japan</b> ,<br>Ph.D. course in Physics<br>Dissertation: “ <i>Joint cosmology analyses using gravitational weak lensing data from Subaru Hyper Suprime-Cam</i> ”<br>Supervisor: Prof. Masahiro Takada | Apr. 2020 – Mar. 2023 |

|                   | <b>University of Tokyo, Tokyo, Japan</b> ,<br>B.A. in Physics                                                                                                                                                                       | Apr. 2014 – Mar. 2018 |

## GRANT & AWARDS

---

Grant-in-Aid for JSPS Research Fellows (DC2), Japan Society for the Promotion of Science, Apr. 2021 – Mar. 2023

**The School of Science Encouragement Award (Doctoral program)**, University of Tokyo, the School of Science, Mar. 2023

**WINGS IGPEES, course completion**, Sep. 2018 – Mar. 2023

## TEACHING

---

Collaborative coding: git and github, **CD3 symposium** 2023, Kavli IPMU

Coadvised students: Rafael C. H. Gomes (a PhD student at UPenn since 2023), Kyle Miller (a visiting student at UPenn, since 2024), Noriaki Nakasawa (a master student at the University of Nagoya, 2022)

## PROFESSIONAL ACTIVITIES

---

## PUBLIC ENGAGEMENT AND OUTREACH

---

Apperence on *Cosmic Front, Primordial Black Hole: the master key of the Universe (title in Japanese)* produced by NHK, 2021

Interviewed by Quanta Magazine on *Clashing Cosmic Numbers Challenge Our Best Theory of the Universe*, 2024

Interviewed by Asahi Shimbun on *Breakdown in the standard model of the Universe? An analysis using precise dark matter “map” (title in Japanese)*, 2024

Interviewed by Jonathan O’Callaghan for *“Is This a Moon-Sized Primordial Black Hole Adrift in the Milky Way?” Scientific American*, 2026.

The up-to-date list of publication available at [ADS](#).

\* = Author list alphabetized

***First-author papers or co-authored papers with significant contributions***

1. **Sugiyama, Sunao**, R. C. H. Gomes, and M. Jarvis. Fast modeling of the shear three-point correlation function. *Phys. Rev. D*, 113(12):123548, [June 2026:123548](#)
2. **Sugiyama, Sunao**, M. Takada, N. Yasuda, and N. Tominaga. Microlensing constraints on Primordial Black Hole abundance with Subaru Hyper Suprime-Cam observations of Andromeda. *arXiv e-prints*, arXiv:2602.05840, [February 2026:arXiv:2602.05840](#)
3. R. C. H. Gomes, K. Miller, **Sugiyama, Sunao**, et al. Tidal alignment and tidal torquing modeling for the cosmic shear three-point correlation function and mass aperture skewness. *arXiv e-prints*, arXiv:2601.09133, [January 2026:arXiv:2601.09133](#)
4. R. C. H. Gomes, **Sugiyama, S.**, B. Jain, et al. Cosmology with second- and third-order shear statistics for the Dark Energy Survey: Methods and simulated analysis. *Phys. Rev. D*, 112(12):123514, [December 2025:123514](#)
